The prior rejections of the claims, mailed October 6, 2005 have been withdrawn in response to applicants' arguments and amendments to the claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 83-86, 98-109, 111-114 are rejected under 35 U.S.C. 103(a) as being obvious over Burke (6,588,363).

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or

declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(I)(1) and § 706.02(I)(2).

Burke discloses a seasoning system and method. Drum 16 provides from a way to rotate and move the seasoned food through the coating system in a reciprocating motion. The claims appear to differ from the reference in the speed at which the tumble drum is turned. One of ordinary skill in the art would be expected to operate the drum in an optimal manner to move the food through without having to incline the tumble drum (see column 7, lines 24-39).

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In*

*re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 83-86, 98-109, 111-114 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 59-65, especially claims 63-65 of U.S. Patent No. 6,588,363. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is not seen that the speed of the forward movement relative to the backward movement alone constitutes unobviousness.

Burke discloses a seasoning system and method. Claims 63-65 provide for coating a tumbling product. The reciprocating aspect of the drum is disclosed in the abstract and at column 7, lines 24-39. Drum 16 provides from a way to rotate and move the seasoned food through the coating system in a reciprocating motion. The claims appear to differ from

the reference in the speed at which the tumble drum is turned. One of ordinary skill in the art would be expected to operate the drum in an optimal manner to move the food through without having to incline the tumble drum (see column 7, lines 24-39).
